

ALRD – Alert Maintenance Detail

This screen is used to display, add or modify the various alerts created by the system, based on caseload activity. The CAPS Information Systems Specialist is the worker responsible for updating this screen.

PATH:
```

Field Descriptions (F12) indicates code lookup is available.

STARTING CODE

Enter the starting code for quick access to a specific alert. “C” = client, “F” = financial, “I” = interface, “J” = juvenile, “P” = payment and provider, “R” = report, “S” = service and “W” = worker.

SEL

If you have update access to the ALRD screen, enter an “A” to add a new alert or “M” to modify an existing alert.

ALERT

This field will display the alert code associated to the alert. The first letter in the code is the alert type (see STARTING CODE field description) followed by “B” (batch) or “O” (online). Batch identifies the alert is created through night processing, online identifies the alert is created immediately when a specific action is performed in CAPS. The last four numbers are the ID number for the alert.

DELETABLE

This field will display a “Y” if the alert is deletable from a worker’s ALER (Alerts) screen or an “N” if the alert is not deletable from a worker’s ALER (Alerts) screen.

SCREEN

This field will display the screen the alert is created from.

DESCRIPTION

This field will display the alert text for the alert.

Additional Information

&01 - &04 information relates to dates or ID numbers. For example, alert CO1005 (&01 APPLICATION WAS ADDED ON &02). In this case, &01 = the type of application (SSI) and &02 = the date the application was added.
